void function Object2D::GetAbsolutePositionY() [*line 64*]

- **Access** public

void function Object2D::MoveOf(\$x, \$y) [*line 94*]

Function Parameters:

- **\$x**
- **\$y**

- **Access** public

void function Object2D::MoveTo(\$x, \$y) [*line 77*]

Function Parameters:

- **\$x**
- **\$y**

- **Access** public

void function Object2D::SetBackgroundColor(\$color) [*line 42*]

Function Parameters:

- **\$color**

- **Access** public

Class Object3D

[line 8]

- **Package** default

Class ObjectCss

[line 9]

- **Package** default

void function ObjectCss::AddClasse(\$classe) [line 60]

Function Parameters:

- **\$classe**

- **Access** public

void function ObjectCss::AddId(\$id) [line 40]

Function Parameters:

- **\$id**

- **Access** public

void function ObjectCss::AddNom(\$nom) [line 50]

Function Parameters:

- **\$nom**

- **Access** public

void function ObjectCss::GetClasses() [line 123]

- **Access** public

void function ObjectCss::GetIds() [line 103]

- **Access** public

void function ObjectCss::GetNoms() [line 113]

- **Access** public

void function ObjectCss::GetPropriete(\$name) [line 133]

Function Parameters:

- **\$name**

- **Access** public

void function ObjectCss::GetProprietes() [line 155]

- **Access** public

void function ObjectCss::IssetClasse(\$classe) [line 93]

Function Parameters:

- **\$classe**

- **Access** public

void function ObjectCss::IssetId(\$id) [line 71]

Function Parameters:

- **\$id**

- **Access** public

void function ObjectCss::IssetNom(\$nom) [line 82]

Function Parameters:

- **\$nom**

- **Access** public

void function ObjectCss::IssetPropriete(\$name) [*line 166*]

Function Parameters:

- **\$name**

- **Access** public

void function ObjectCss::SetPropriete(\$nom, \$value) [*line 145*]

Function Parameters:

- **\$nom**
- **\$value**

- **Access** public

void function ObjectCss::__get(\$name) [*line 177*]

Function Parameters:

- **\$name**

- **Access** public

void function ObjectCss::__isset(\$name) [line 199]

Function Parameters:

- **\$name**
- **Access** public

void function ObjectCss::__set(\$name, \$value) [line 188]

Function Parameters:

- **\$name**
- **\$value**
- **Access** public

Class Option

[line 151]

- **Package** default

Class RECTANGLE

[line 97]

- **Package** default

void function RECTANGLE::DrawnObject() [line 127]

- **Access** public

void function RECTANGLE::Set(\$x, \$y, \$w, \$h) [line 108]

Function Parameters:

- **\$x**
- **\$y**
- **\$w**
- **\$h**

- **Access** public

Class ROND

[line 287]

- **Package** default

void function ROND::DrawnObject() [line 293]

- **Access** public

Class SELECT

[line 140]

- **Package** default

Class SProxy

[line 10]

- **Package** default

Constructor *void* function SProxy::__construct([\$objets = array()]) *[line 24]*

Function Parameters:

- **\$objets**

- **Access** public

void function SProxy::SProxy_Add(\$objet) *[line 52]*

Function Parameters:

- **\$objet**

- **Access** public

void function SProxy::__call(\$method, \$arguments) [*line 37*]

Function Parameters:

- **\$method**
- **\$arguments**

- **Access** public

Class TABS [*line 91*]

- **Package** default

Class TEXTAREA [*line 129*]

- **Package** default

Class TEXTE

[line 143]

- **Package** default

TEXTE::ReturnLine

= "\r\n" *[line 167]*

void function TEXTE::AddText(\$text) *[line 211]*

Function Parameters:

- **\$text**

- **Access** public

void function TEXTE::AddTextL(\$text) *[line 223]*

Function Parameters:

- **\$text**

- **Access** public

void function TEXTE::DrawnObject() [*line 253*]

- **Access public**

void function TEXTE::Set(\$x, \$y) [*line 236*]

Function Parameters:

- **\$x**
- **\$y**

- **Access public**

void function TEXTE::SetFont(\$value) [*line 187*]

Function Parameters:

- **\$value**

- **Access public**

void function TEXTE::SetSize(\$value) [*line 175*]

Function Parameters:

- **\$value**

- **Access public**

void function TEXTE::SetText(\$text) [*line 199*]

Function Parameters:

- **\$text**
- **Access** public
